

# Cassini Guidance System: Real-Time Toric Alignment, Seamlessly Integrated Into Your Surgical Suite

Intraoperative tracking and overlay powered by Cassini data - compatible with leading surgical microscopes

Real-time toric IOL alignment within 3° of target<sup>1</sup>

Heads-up overlay for precision consistency

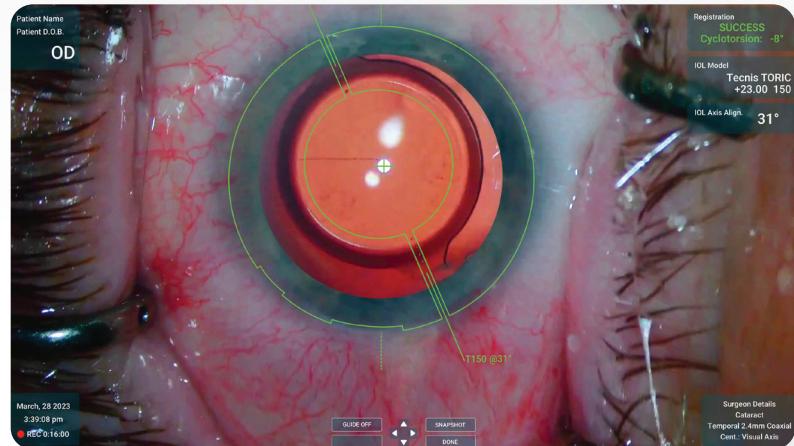

Plug-and-Play integration with leading surgical microscopes

## Connected by Cassini Ambient

The Cassini Guidance System uses the diagnostic and planning data from Cassini Ambient to provide accurate, real-time intra-operative alignment.

## Key Advantages

- Flexible integration - use your preferred microscope
- Combines preoperative precision with intraoperative accuracy
- Plug-and-play setup - minimal training or hardware changes
- Consistent, reproducible outcomes for premium cataract surgery<sup>2</sup>

Bring Cassini precision into your OR
